

Coldstream Research Campus - Lexington, KY

The Coldstream Research Campus is the gateway to Lexington's high-tech, higher education corridor with connections to downtown Lexington and the University of Kentucky. Located at the intersection of I-64 and I-75, the once-prominent horse farm has transformed into a 735-acre hub of innovation and creativity. Coldstream is the location of choice for locally grown research and development companies and contributes to the city of Lexington's vibrant entrepreneurial community, educated workforce, low cost of living, and high quality of life. Coldstream companies include those working in biotechnology, pharmaceuticals, equine health, and a variety of other business sectors. Many have ties to the University of Kentucky, including graduates of ASTeCC, UK's high-tech business incubator. Others have licensed UK intellectual property or are clients of UK Innovate. Visit UKColdstream.com for information on the research campus and the companies that call it home.
